

Self-Guided Tour of the Gang Weeds

Self-Guided Tour of
the Gang Weeds.

Part of
Art Day is Today
www.gangfestival.com

Disclaimer:

All of those species were
present at the time of printing.
If for reasons of continuous
suppressing some of them are
not found on subsequent visits,
do come back, chances are that
they will be back too. Nothing
more resilient than weeds, they
got used to human's interference.

Disclaimer2:

We will accept no responsibility
for people hurting or poisoning
themselves, misjudging or
misinterpreting the information
provided in this leaflet or
otherwise being not happy about
the level of artistic merit the
Weedyconnection project has.

Nevertheless we welcome
comments.
