Gough Whitlam Park, New South Wales

**Disclaimer:**  
All of those species were present at the time of printing. If for reasons of continuous suppressing some of them are not found on subsequent visits, do come back, chances are that they will be back too. Nothing more resilient than weeds, they got used to human's interference.

**Disclaimer2:**  
We will accept no responsibility for people hurting or poisoning themselves, misjudging or misinterpreting the information provided in this leaflet or otherwise being not happy happy about the level of artistic merit the Weedyconnection project has. Nevertheless we welcome comments.
